
Modern PRE benchmark
HRA
honest re-encryption to a corrupt recipient remains available
Ciphertext granularity
G-CONF-CT
a modified, nonderivative target ciphertext may be transformed for a corrupt delegatee
one proxy query
Point-shifting attack
$A' = A + rK$; one proxy query recovers Q^*
UNCONDITIONAL FAILURE
advantage 1
Class granularity
G-CONF-CLASS
target-class grants and transformations to corrupt recipients are refused
hybrid argument
Hybrid proof obligations
$G_0 \longrightarrow G_1 \longrightarrow G_2 \longrightarrow G_3 \longrightarrow G_4$
mask | intake | pad | opening
CANDIDATE REDUCTION
independent review pending
Fixed-target G-SCOPE
independent non-target class keys
CANDIDATE COMPOSITION
exact; no additional loss
defined game / unconditional result
candidate proof
